As Judge Hood requested to follow the Clerk, I have archived the Williamson County (C) 2025 decision I am assuming that despite not telling me the date is sufficient for no further answers needed from Carolyn Pett. No default judgement. No money on the page owed. Understood the clerk files these. Prompt filing appreciated.

Appreciate that we can both walk away with what we want (the plaintiff and myself). No contact, (I deleted all social media), and I wish him well because I didn't realize what this would cause. I was never even aware of an SEC Whistleblowers program nor did I accuse him of anything I was curious and reasonably inquiry was all I had for him - I sympathize for panic on Mr. Pagliara but I do not consider myself a crusader or a judge of anyone's actions. I simply am happy to move our separate ways. I have been fully transparent. This matter is now closed. I will pursue my no contact but that is just because I am holding up that end of the bargain that I've become aware is best for both of us. I don't think there's any need to violate my request for the same. I just need to use my local court to make sure it is equal on my end. I think Mr. Pagliara is a person who proved that he is a reasonable man. I don't believe he was aware of my mental illness. If he is the reason for the ending of this. Give him my best. Please move forward and lets never cross paths again - unless by chance in which case I hope you, Mr. Pagliara, keep up a highly ranked reputable business.
